

1st Conference

Sustainable Solutions for Growth (SSG) 2018

Venue

Wrocław, Poland

Date

17-18 September 2018

CALL FOR ABSTRACTS

Invitation

The Conference Chair, International Innovation Committee, Scientific Advisory Board and Entrepreneurial Advisory Board cordially invite you to present your sustainable solutions, communicate your recent research, demonstrate your expertise and examine new sustainable solutions as investment opportunities for your organisation.

Scope

The **Sustainable Solutions for Growth (SSG)** conference is designed as a platform for reporting, discussing, improving and disseminating recent innovative and sustainable solutions facilitating economic growth. SSG is designed as a highly interdisciplinary event bringing together innovators, researchers, investors and other stakeholders under common goal - creating, evaluating, implementing and benefiting from sustainable innovations. SSG will thus support innovative projects and bring benefits to all involved stakeholders. Participants from universities, institutes, NGOs, associations, companies, venture capital funds, consultancies, etc. are invited. It is an international conference with ambitions to share leading ideas, expertise and highlight business opportunities. SSG aims to be one of the most influential channels transferring innovative sustainable solutions from owners to practice thereby these solutions may start to generate revenues. The conference is a must for research groups and individuals developing truly innovative and sustainable solutions and seeking opportunities for commercialisation. On the other hand, commercial companies seeking opportunities to invest in innovations and expanding to new markets will be interested in examining solutions presented at SSG. This will be achieved under the umbrella of expert consultants and service providers which also may benefit from the participation in SSG. Research done in academia related to e.g. innovation management, economic growth or in any way supporting the development and evaluation of high-income sustainable solutions is also vital to the success of SSG. The conference will therefore facilitate interactions between innovators and investors under the umbrella of associated stakeholders and scientific institutions. In addition, delegates from enterprises may benefit from sponsoring, exhibiting and networking thus creating the environment for enhanced business development. The participation mode can be either in-person or virtual. Digital conference Proceedings including abstracts and contact details of all accepted contributions will be published on-line in open-access. The abstracts of sustainable solutions in the open-access will not reveal confidential information, which can be obtained by contacting inventors. Submitted full manuscripts will be internally reviewed by SSG international referees and review outcomes communicated to authors for facilitated publication in leading international journals and edited books. The most innovative sustainable solutions presented at SSG might be implemented in the business practice thus bringing benefits for innovators, investors and associated stakeholders.

Conference structure

The conference structure consists of plenary lectures, keynote lectures, oral lectures and short communications which all relate to research. Sustainable solutions are presented as short communications in special sessions. In addition, an ISC/SAB meeting, thematic panel discussion and awards for best presenters of research and best sustainable solutions are envisaged.

Types of abstracts

Participants are requested to provide abstracts in one of two formats, either as a sustainable solution abstract or as a research abstract. The sustainable solution abstract is designed for sustainable solutions with potential for commercialisation. The research abstract is designed for research behind sustainable solutions. The research abstract can relate to theory, experiments, analysis, etc. Both types of research abstracts will be presented in different conference sessions and separated on conference Proceedings. The authors contributing a research abstract may also contribute one associated sustainable solution abstract within the same fee (participation in-person (all days)).

Publications

(1) Abstracts in digital Proceedings

All abstracts of conference participants will be published on the peer-reviewed **digital Proceedings**. The maximum length of the abstract is 1 page. Proceedings will be published on-line in open-access with an ISBN number.

Peer-review procedure: (i) a minimum of two independent experts review all submissions, (ii) final abstracts must be approved by two experts.

Editor of Proceedings: Budzianowski W.M.

(2) Articles in journals

Full articles associated with contributions presented at the SSG conference will be facilitated for publication in **journals**. Conference internal reviewers will advise authors on how to improve the manuscripts and suggest journals suitable for publication. Editors associated with SSG will invite selected manuscripts to journals. Authors will make decisions regarding selection of a journal suitable for publication. Final revised articles submitted to journals by the authors will undergo peer-review procedures consistent with journals' standards. Typically, at least two independent journals' reviewers will have to approve the final manuscripts.

In addition some journals will offer special issues or invite/accept regular submissions for selected SSG full papers. The publication process will be supported by conference editors and reviewers.

Journals will include e.g.:

- Journal of Sustainable Solutions and Innovation Management (new journal associated with SSG conference topics),
- Journal of Power Technologies (Web of Science indexed, unofficial impact factor 1.1),
- Journal of Renewable Energy Sources - Technology, Business and Policy (new journal associated with RESRB conference topics),
- Energies (impact factor 2.262, Special Issue "Production and Utilization of Biogas", Guest Editor Wojciech Budzianowski;
http://www.mdpi.com/journal/energies/special_issues/Production_and_Utilization_of_Biogas), etc.

Other leading thematic journals will be continuously involved.

(3) Chapters in edited books

Full articles associated with contributions presented at the SSG conference will be facilitated for publication in **edited books**. Conference reviewers will advise authors on how to improve the manuscripts. Book Editors will invite selected manuscripts. Authors will select an edited book for publication. Peer review procedure for edited books: two independent reviewers must approve manuscripts. The conference will support the creation of edited books relevant to conference themes.

(4) Book

In case a full material associated with the contribution presented at the SSG conference can be extended to a book size (40-300 standard pages) it may be facilitated for publication as a **book** (a monograph). Conference reviewers and the professional book editorial team at Wojciech Budzianowski Consulting Services will assist authors in meeting standards and market requirements for book publication. Authors interested to publish their extended material in a book format need to first contact wojciech1@budzianowski.eu to discuss publication process details, costs and potential benefits for the parties. In general books can be published in a standard model or in open access model by large book publishers or by Wojciech Budzianowski Consulting Services with ISBN. Book authors usually will be offered a contract and depending on the scope of the work required for book publication and publication model it may include a remuneration for book authors. Review procedure for books: independent reviewers are involved in the entire publication process.

Acknowledgments

When submitting your full conference paper to journals/edited books please acknowledge the conference presentation as follows:

The work has been presented at the 1st Sustainable Solutions for Growth (SSG) conference held on 17-18 September 2018 in Wrocław (Poland).

Oral lecture requirements

Please prepare a presentation for your oral lecture in power point or similar software with additional conversion to pdf. Your oral lecture will take 15 minutes + 5 minutes discussion.

Short communication/virtual short communication requirements

Please prepare your short communication/virtual short communication in a power point or pdf format. You will show your short communication to the audience during the conference short communication session (5 minutes + 3 minutes discussion). The virtual short communication of virtual participants will be presented by a Committee member or by using your video.

Short communication/virtual short communication format:

1 page short communication title page with authors,

0-2 pages CV of the corresponding author with a photograph including his/her research in renewable energy (virtual short communications only), this should clarify your expertise in the researched field, 2-5 pages main research results in the form of figures, photographs, schemes etc. (each item is clearly described by one sentence), if text is essential use very short bullet points,

1 page conclusion in short bullet points.

Please make sure that your virtual short communication is sufficiently comprehensive that it can be presented to the audience by someone who did not participate in your research and that the audience will understand the main points. Use comprehensive figures and short bullet points. Focus on your novel findings. Avoid too much text. Research goals, conclusions and originality must be particularly clear. In conclusions emphasise one key message you wish to communicate to the conference academic and/or business audiences that was formulated based on your research.

Virtual short communication in video format:

Alternatively virtual short communication may be prepared in a video format (5 minutes). The video may simply include your slides and your comments, preferably with a visible face. The preferred format is mp4 HD. The video will be displayed to the audience during the short communication session.

Send your virtual short communication at least 1 month prior the conference to:
wojciech1@budzianowski.eu

Business participation at SSG

Business participants may sponsor or exhibit at SSG and additionally:

- evaluate most promising sustainable solutions presented at SSG as investment opportunities,
- launch novel products and highlight existing ones,
- enhance company sales and educate the market,
- spotlight key executives,
- increase brand awareness and position the organisation in the renewable energy community,
- elevate visibility of the company in focused markets,
- benefit from interaction with a highly qualified scientific community,
- network with experts and form new alliances with national and international clients,
- have access to new knowledge and attract new innovations to the company,
- build business relationships for the future.

For participants seeking academia-business interactions the organisational structure of SSG will provide relevant opportunities. Start-ups and other knowledge and innovation driven enterprises are particularly welcome at SSG.

Sponsorship and exhibition

Various forms of sponsorship are available. An exhibition will run alongside the conference sessions. Companies may advertise either physically at the conference or electronically exploiting dedicated solutions. These services are offered on a first-come, first-served basis. To discuss your requirements or to book sponsorship or exhibit space please contact the Executive Organiser at email: wojciech1@budzianowski.eu; or tel.: +48 792781784.

Ethical considerations

This conference is a platform aimed at raising academic quality of science and linking the different types of participants (e.g. research, business and policy) with consideration of ethical standards to the highest possible extent. The conference seeks only original contributions. Internal review processes for abstracts and full manuscripts aim at fair evaluation of professional quality. The criteria of quality include among others: originality, conciseness, profundity, societal impact, relevance to the conference subject. Conference contributions are judged only on merits without regard to authors' race, gender, seniority, nationality, affiliation or political views. The internal review process is single blind and confidential. All ethical issues regarding any conference contribution such as plagiarism, conflict of interests, errors or violation of intellectual property rights should be immediately reported and such contributions will be excluded from the conference. Please report all important ethical issues directly to wojciech1@budzianowski.eu.
